A large industrial facility, possibly a refinery or power plant, is shown at night. The scene is dominated by tall, complex structures of pipes, scaffolding, and towers, illuminated by a cool blue light. The sky is dark, and the overall atmosphere is industrial and technical.

Values to Our Employees

To provide you with the best working environment that can allow you to learn and grow

Values to Our Partners

To be transparent and ensure that we grow and succeed together.

Our Products & Solutions :

- Standard / Commercial UPS
- Modular UPS
- Industrial / Customized AC/DC UPS
- Rectifiers & Battery Chargers for telecom applications
- Data Centers infrastructure solutions
- Automatic Voltage Regulators
- VRLA / Ni-Cad Batteries
- Automatic Transfer switches
- Power Generators
- Motor Speed Drives
- Frequency Converters

Business Divisions:

SINA offers its customers a comprehensive spectrum of products and services serving the various sectors of activities in the region , these sectors are serviced by four divisions:

- Power Systems Division.
- Data Center Infrastructure Division.
- Electromechanical Contracting Division.
- Maintenance & Service Division.

Poewr Systems Division :

I. Industrial Power Solutions

To better serve our customers with the latest technology available, SINA agreed with AEG Power Solutions to be its sole agent in Egypt. With almost 80 years' experience in power conversion, AEG offers

a wide range of reliable equipment to encompass any demand:

- Rectifiers-Battery Chargers.
- Customized Uninterruptible Power Systems (1ph and 3ph).
- Batteries (Ni-Cad, VRLA) can be sized and supplied together with the power systems.

II. Standard Uninterruptible Power Supply (UPS)

To better serve our customers with the latest technology available, SINA agreed with AEG, CENTIEL & SATRON.

Because we are committed to highest standards, quality, and reliability we can offer wide range of

Uninterruptible Power Supply.

- Single Phase UPS from 1kVA up to 10 kVA
- Three Phase UPS from 10 kVA up to 800 kVA
- Modular UPS up to 3.6MVA

Data Center Infrastructure Division

By providing comprehensive design, implementation and support solutions for advanced requirements, we balance the needs of your network physical infrastructure. Site plans, develops and operates high availability data centers whose infrastructures provide the highest level of physical security and operational reliability including.

- UPS and Power Distribution Systems.
- Emergency Diesel Generators.
- Computer Room Precision Air Conditioning.
- Raised Access Flooring Systems.
- Building Automation and Management Systems.
- Safety Systems (Fire Alarm and Suppression).
- Security Systems.
- Networking.
- Blast-Resistant Structures.
- Distribution Panel Boards.

Electromechanical Contracting Division

SINA undertakes electrical, electro-mechanical, plumbing and HVAC turnkey contracts in commercial, residential and industrial buildings.

MEP Activitie

- Earthing & Lightning Protection
- LV Conductors and Cable Laying
- Raceways and Trays
- Wiring and Lighting Control Devices
- UPS and Generators
- Enclosed Switches and Circuit Breakers (LV)
- Panel Boards
- Lighting
- Low Current & Integrated Security Systems
- HVAC Systems
- Plumbing
- Drainage
- Fire Fighting Systems

MEP Services

- Turnkey Project Estimation
- Design, Calculations and Shop Drawings
- Material Submittals and Approvals
- Installation, Testing & Commissioning of Complete Systems
- Including tie-ins with External Services
- Related Governmental Authorities Certification / Approvals
- Feasibility Study
- Planning & Risk Assessment
- Testing & Commissioning
- Maintenance
- Quality Assurance & Control

Maintenance & Service Division :

At **SINA** own test Labs, our dedicated staff pays close attention to the smallest details.

The modern test Labs comprises twelve test stations that are equipped with latest computerized test systems available in the industry.

We thoroughly test every system for functionality and performance. Upon successful completion of the internal testing, we arrange for a factory acceptance test witnessed by the customer, and a detailed testing report.

Test programs are set up according to stringent and internationally approved standards, and can moreover be modified to fit our customer's requirements.

Our Elements Of Strength

To be able to provide services in this sector of technology, we have employed a professional team that consists of consultants, designers, service engineers and technicians in order to build a project oriented team capable of assisting you in the different phases of your project .

- Technical and economical proposal.
- System Engineering.
- Project documentation.
- Inspections during manufacturing.
- Witness tests.
- Commissioning and start-up.
- Training and technology transfer.
- After sales support.
